

Mathematics Education Master's Program

In order to complete the master's program in Mathematics Education, at least 7 courses, 3 of which are must and 4 of which are elective, and a seminar course must be successfully completed, with a minimum of 21 credits,. In addition to these courses, it is also necessary to be successful in the Master's Thesis Study. Information about the must courses and their credits are presented in the table below.

In the cases where the Master's Admission Committee considers that it is necessary, students who complete the undergraduate degree in an area outside the program will be required to successfully complete the recommended courses for the scientific preparation.

Program
